CAPACITI TECH CAREER ACCELERATOR

USER GUIDE

Clicks to Fixers is an interactive AI learning assistant that explains core Artificial Intelligence concepts in plain language. It is designed for beginners entering the tech industry and covers topics from the CAPACITI bootcamp **Modules 1–4**. No login, installation, or prior knowledge is required — simply open the link in any web browser and start exploring.

INTERFACE OVERVIEW

AREA	LOCATION	WHAT IT DOES
Left Sidebar	Far left panel	Choose guided learning flows, quick concept tags, and interactive features
Chat Window	Centre panel	Displays all messages, responses, diagrams, and quiz cards
Input Bar	Bottom of centre	Type a question or click a suggestion chip to interact with the bot
Right Panel	Far right	Browse curriculum modules, track topic progress, and read rotating AI facts
Header Bar	Top of screen	Displays connection status and the dark/light mode toggle

6 WAYS TO INTERACT

1 Type a Question

Click the input bar, type any AI question, and press **Enter** or **Send**.

Examples: "What is machine learning?" / "Explain neural networks" / "What is AI ethics?"

2 Suggestion Chips

Click any chip above the input bar to ask a pre-set question instantly — no typing needed. Chips update based on your last response.

3 Guided Flows

Click a flow in the sidebar to follow a structured, step-by-step learning path. Steps 2 and 3 appear as chips after Step 1 loads.

4 Quick Concepts

Click any tag in the sidebar (ML, LLMs, GANs, Transformers, etc.) for an instant explanation of that concept.

5 View Diagrams

Click any diagram button in the sidebar to display a visual — AI/ML/DL hierarchy, Neural Network, NLP Pipeline, or Ethics Framework.

6 Take a Quiz

Click **? Take a Quiz** in the sidebar. Select an answer from 4 options and receive instant feedback with an explanation.

GUIDED LEARNING FLOWS

Learn about NLP

NLP Definition → Real-World NLP Applications → Key Challenges in NLP

Explore AI Ethics

AI Ethics Overview → Bias in AI → Privacy Considerations in AI

AI vs ML vs Deep Learning

What is AI? → What is Machine Learning? → AI vs ML vs Deep Learning Hierarchy

Neural Networks Deep Dive

What is a Neural Network? → What is Deep Learning? → What are LLMs?

Computer Vision Path

What is Computer Vision? → What is Deep Learning? → Real-World AI Applications

READING A BOT RESPONSE

 Title + Module	Shows the topic name and which CAPACITI module (1-4) it belongs to
 Explanation	Clear, beginner-friendly answer with key terms highlighted
 Related Topics	Clickable buttons to explore connected AI concepts
 Further Learning	Recommends the exact bootcamp module to study next
 Feedback Buttons	Rate the response as Helpful or Not Helpful

IF THE BOT DOESN'T UNDERSTAND

If your question is outside the knowledge base, the bot responds with:

"I didn't quite catch that — I specialise in AI concepts."

Five suggested topic buttons will appear. Try rephrasing your question, use a simpler term, or click one of the guided flows in the sidebar.

TIPS FOR BEST RESULTS

-  Ask one concept at a time for the clearest answers
-  Click **Related** buttons after each answer to go deeper
-  Use guided flows for structured, step-by-step learning
-  Complete all 5 flows to fill your progress bars to 100%

ADDITIONAL FEATURES

**Dark / Light Mode**
Toggle theme using the switch in the top-right corner

**Progress Tracking**
Right panel bars fill as you explore topics per module

**Did You Know?**
Rotates a new AI fact every 14 seconds in the right panel

**Reset Chat**
Clears conversation and returns to the welcome screen

**Accessing the Chatbot:** Open the public link in any modern web browser (Chrome, Firefox, Edge, Safari). No login, download, or installation required. The chatbot is fully functional on both desktop and mobile devices.
